III. Agenda Items for Consideration

1. Review of 2018 PSC Annual Report

The Public Service Commission (PSC) report was in the meeting packet.

Utility Operations Manager Steinagel mentioned page W-13, which provides details on the age of water mains. He stressed the importance of adhering to the schedule for replacing mains. He also noted a 5% decrease in water loss from the previous year. Water audits are conducted annually to help monitor water loss.

No action on the report was necessary, requested or taken.

2. Review of Water Utility Return on Rate Base Historical Information

Information was in the meeting packet.

Public Works Director/City Engineer Akey stated that the current Return on Rate Base for the City is 1.26%. The Public Service Commission is of the opinion that a water utility should be considered similar to a business, and they recommend a Return on Rate Base of between 5% and 6%. Based on these facts, Public Works Director/City Engineer Akey will be recommending a 3% water rate increase, to be considered at the next meeting. If the increase is approved, it would then be submitted to the PSC for their approval/disapproval.

Public Works Director/City Engineer Akey was instructed to submit his request and all related information to the next meeting for consideration. No action was taken at this time.

IV. Monthly Report

The report was in the meeting packet.

Utility Operations Manager Steinagel reviewed the report. All residents that were running water have been notified to stop running. Routine meter changes continue. Spring hydrant flushing will take place the end of May. Implementation of the sand and grease trap ordinance has begun.
